

Deep Learning with Stacked AEs & RBMs

DD2437 - Artificial Neural Networks & Deep Architectures - Lab 4

Niels Agerskov	Lukas Bjarre	Gabriel Carrizo
agerskov@kth.se	lbjarre@kth.se	gabcar@kth.se

This lab will examine two different artificial neural network structures, Auto Encodes (AE) and Restricted Boltzmann Machines (RBM). Their effectiveness in a learning task and the effect of the layer depth of the models will be tested and evaluated.
